MEMORANDUM

Date: June 6, 2005

Subject: Contract Laboratory Program Data Review

From: *for M. El-Feky* Marvelyn Humphrey, ESAT Regional PO, 6MD-HE

To: V. Malott ,SF-AP

Site : JONES ROAD GROUND WATER PLUME

Case# : 34159

SDG# : F1FJ7

The EPA Region 6 Houston Branch ESAT data review team has completed a review of the submitted Contract Laboratory Program (CLP) data package for the referenced site. The samples analyzed and reviewed are detailed in the attached Regional data review report.

The data package is acceptable for regional use. Problems, if any, are listed in the report narrative.

If you have any questions regarding the data review report, please call me at (281) 983-2140.

MEMORANDUM

DATE: June 3, 2005
TO: Marvelyn Humphrey, ESAT PO, Region 6
FROM: Tom C.H. Chiang, ESAT Program Manager, Region 6 *Tom C.H. Chiang*
SUBJECT: CLP Data Review
REF: TDF # 6-05-108A ESAT # O-0731
 ESAT Contract No. 68-W-01-030

Attached is the data review summary for Case # 34159
SDG # F1FJ7
Site Jones Road Ground
Water Plume

COMMENTS:

I. CONTRACTUAL ASSESSMENT OF THE DATA PACKAGE

Hardcopy review detected the following noncompliant item
that CCS is not expected to detect.

The data package was two working days late for the
seven-day turnaround time requirement.

II. TECHNICAL USABILITY ASSESSMENT OF THE DATA PACKAGE

The total number of sample results reviewed was 1000 for
this data package. Some results were qualified for minor
technical problems.

8. INTERNAL STANDARDS	O
9. COMPOUND ID/QUANTITATION	O
10. PERFORMANCE/COMPLETENESS	O
11. OVERALL ASSESSMENT	M

O = Data had no problems.

M = Data qualified because of major or minor problems.

Z = Data unacceptable.

NA = Not applicable.

ACTION ITEMS: The data package was two working days late for the seven-day turnaround time requirement.

AREA OF CONCERN: Methylene chloride failed the technical %D calibration criteria. Some results were qualified for eight samples because of laboratory/shipping contamination.

NOTABLE PERFORMANCE:

COMMENTS/CLARIFICATIONS
REGION 6 CLP QA REVIEW

CASE_34159 SDG F1FJ7 SITE Jones Road Ground Water Plume LAB A4

The following is a summary of sample qualifiers used by Region 6 in reporting this CLP data:

<u>No.</u>	<u>Acceptable</u>	<u>Provisional</u>	<u>Unacceptable</u>
VOA	12	8	

COMMENTS: This SDG, contracted under low concentration SOW OLC03.2, consisted of 20 water samples for VOA analysis. The OTR/COC Records designated sample F1FJ7 as the laboratory QC sample. The samples in this SDG were associated with trip blank samples F1G95 (SDG F1G35) and F1G96 (SDG F1FR1) and field blank samples F1G83 (SDG F1G35) and F1G84 (SDG F1FR1). The RSCC confirmed that samples F1G03 and F1GB8 (SDG F1FR1) were a field duplicate pair. The data package arrived two working days late for the contractual seven-day turnaround time requirement. The data package was otherwise contractually compliant.

Modified full review was performed on this package as requested by the TDF. The target compounds of concern with the user's desired detection limits in parentheses were vinyl chloride (2 µg/L), trans-1,2-dichloroethene (7 µg/L), cis-1,2-dichloroethene (7 µg/L), and tetrachloroethene (5 µg/L). All samples met the desired detection limit requirements. The target compounds of concern detected at concentrations above the user's desired detection limits were cis-1,2-dichloroethene and/or tetrachloroethene in samples F1FP8, F1FQ2, and F1FZ4. Samples F1FP8 and F1FQ2 were diluted (up to 20X) and reanalyzed because of high concentrations of cis-1,2-dichloroethene and/or tetrachloroethene. The compounds not designated as the target compounds of concern but reported at concentrations above the CRQL's in the samples were acetone, methyl tert-butyl ether, trichloroethene, and/or laboratory contaminant methylene chloride.

Some results are provisional for eight samples because of problems with calibration and laboratory/shipping contamination. The technical usability of all reported sample results is indicated by ESAT's final data qualifiers in the Data Summary Table (DST). An Evidence Audit was conducted for the Complete Sample Delivery Group File (CSF), and the audit results were documented in the Evidence Inventory Checklist.

NOTE: THE FOLLOWING REVIEW NARRATIVE ADDRESSES BOTH CONTRACTUAL ISSUES (BASED ON THE STATEMENT OF WORK) AND TECHNICAL ISSUES (BASED ON THE NATIONAL FUNCTIONAL GUIDELINES). THE ASSESSMENT MADE FOR EACH QC PARAMETER IS SOLELY BASED ON THE TECHNICAL DATA USABILITY, WHICH MAY NOT NECESSARILY BE AFFECTED BY CONTRACTUAL PROBLEMS. THE ASSESSMENTS ARE DEFINED BELOW.

Acceptable = No results were qualified for any problem associated with this QC parameter.

**ORGANIC QA REVIEW
CONTINUATION PAGE**

CASE 34159 SDG F1FJ7 SITE Jones Road Ground Water Plume LAB A4

Provisional = Some results were qualified because of problems associated with this QC parameter.

Unusable = All results are unusable because of major problems associated with this QC parameter.

1. Holding Times: Acceptable. The samples met the contractual and technical holding time criteria and were acid-preserved.

NOTE: Polymerization of vinyl chloride and styrene is likely to occur in acid-preserved samples and could cause low biased results for these two compounds.

2. Tuning/Performance: Acceptable. The BFB analyses met GC/MS tuning criteria.

3. Calibrations: Provisional. All calibrations met contractual criteria. Several analytes failed technical %RSD and/or %D calibration criteria. The reviewer qualified as estimated the methylene chloride results above the CRQL for samples F1FJ7, F1FQ2, F1FZ5, and F1G03 because of the outlying %D. Other compounds with outlying %D/%RSD were not reported at concentrations above the CRQL's in the associated samples, so result qualification was not required per Region 6 guidelines.

4. Blanks: Provisional. The method, storage, and instrument blanks met contractual requirements. All method blanks contained methylene chloride at concentrations below the CRQL, and the storage blank contained acetone and methylene chloride at concentrations also below the CRQL's. However, the methylene chloride in the storage blank was probably introduced during the analysis, not sample storage. The effects of the laboratory contamination are summarized below.

- The methylene chloride results above the CRQL were qualified as undetected ("U"), and the reported concentrations should be used as raised quantitation limits ("M").
- The results for acetone and methylene chloride below the CRQL's should be considered as undetected and were "U"-flagged at the CRQL's on the DST.
- The acetone result above the CRQL for sample F1G05 was qualified as estimated ("J").

Trip/Field Blanks: Field blank samples F1G83 (SDG F1G35) and F1G84 (SDG F1FR1) were free from target compound contamination. Trip blank samples F1G95 (SDG F1G35) and F1G96 (SDG F1FR1) contained acetone at concentrations above the CRQL. The effects of this shipping contamination are summarized below.

ORGANIC QA REVIEW
CONTINUATION PAGE

CASE 34159 SDG F1FJ7 SITE Jones Road Ground Water Plume LAB A4

- The acetone results below the CRQL for the field samples should be considered as undetected and were "U"-flagged at the CRQL on the DST.
- The acetone result above the CRQL for field sample F1G05 was qualified as estimated ("J").

5. Deuterated Monitoring Compounds (DMC's)/Surrogates:

Acceptable. All analyses met the contractual DMC recovery criteria although 10 samples had one or two DMC recoveries above the QC limits. Since either the compounds associated with the outlying DMC recoveries were not detected or the DMC recoveries were only marginally above the QC limits, result qualification was unnecessary in the reviewer's opinion.

6. Matrix Spike/Matrix Spike Duplicate (MS/MSD): Acceptable. The MS/MSD results met the QC criteria for precision and percent recovery.

7. Other QC:

Field Duplicates: Acceptable. The field duplicate results were consistent.

8. Internal Standards (IS): Acceptable. IS performance was acceptable for all analyses.

9. Compound Identity/Quantitation: Acceptable. Target compounds reported at concentrations above the CRQL's were acetone, methyl tert-butyl ether, trichloroethene, cis-1,2-dichloroethene, tetrachloroethene, and/or laboratory contaminant methylene chloride in 11 samples. Samples F1FP8 and F1FQ2 were diluted (up to 20X) and reanalyzed because of high concentrations of cis-1,2-dichloroethene and/or tetrachloroethene. No compound identification or quantitation problem was detected.

10. Performance/Completeness: Acceptable. The laboratory resubmission in response to CCS was received. The resubmitted page 6 was used to replace the corresponding page in the original package. The data package was complete. The DST included in this report is the final version.

11. Overall Assessment: Results were acceptable for 12 samples. Some results were qualified for samples F1FJ7, F1FQ2, F1FZ5, F1G03, F1G05, F1G07, F1G43, and F1G51 because of problems with calibration and laboratory/shipping contamination.

HEADER DEFINITIONS FOR ORGANIC EXCEL DST

CASE: Case Number
SDG: SDG Number
EPASAMP: EPA Sample Number
LABID: Laboratory File/Sample ID
MATRIX: Sample Matrix
ANDATE: Sample Analysis Date
ANTIME: Sample Analysis Time
CASNUM: Compound CAS Number
ANALYTE: Compound Name
CONC: Compound Concentration
LABQUAL: Laboratory Qualifier
UNITS: Concentration Units
ADJCRQL: Adjusted Contract Required Quantitation Limit Value
CRQLLBL: Contract Required Quantitation Limit Label
SMPDATE: Sampling Date
VALDQAL: Region 6 Organic Data Validation Qualifier (see Organic Data Qualifier Definitions on the next page)
STATLOC: Station Location

Disclaimer: ESAT verified the accuracy of the information reported in the Excel DST only for the following data fields: CASE, SDG, EPASAMP, MATRIX, ANALYTE, CONC, UNITS, and VALDQAL. The data qualifiers in the VALDQAL column indicate the technical usability of the reported results.

ORGANIC DATA QUALIFIER DEFINITIONS

The following definitions provide brief explanations of the ESAT-Region 6 qualifiers assigned to results in the Data Summary Table.

- U** Not detected at reported quantitation limit.
- N** Identification is tentative.
- J** Estimated value.
- L** Reported concentration is below the CRQL.
- M** Reported concentration should be used as a raised quantitation limit because of interferences and/or laboratory contamination.
- R** Unusable.
- ^** High biased. Actual concentration may be lower than the concentration reported.
- v** Low biased. Actual concentration may be higher than the concentration reported.
- F+** A false positive exists.
- F-** A false negative exists.
- B** This result may be high biased because of laboratory/field contamination. The reported concentration is above 5X or 10X the concentration reported in the method/field blank.
- UJ** Estimated quantitation limit.
- T** Identification is questionable because of absence of other commonly coexisting pesticides.
- *** Result not recommended for use because of associated QA/QC performance inferior to that from other analysis.
- W** The result should be used with caution. The result was reported on a dry weight basis although the sample did not conform to the EPA Office of Water definition of a soil sample because of its high water content (>70% moisture).

Item	Description																																																																																																																												
3.	The auditor corrected a minor pagination error on Form DC-2-4.																																																																																																																												
ORIGINALS	YES	NO	N/A																																																																																																																										
CUSTODY SEALS																																																																																																																													
1. Present on package?	X																																																																																																																												
2. Intact upon receipt?	X																																																																																																																												
FORM DC-2																																																																																																																													
3. Numbering scheme accurate?		X																																																																																																																											
4. Are enclosed documents listed?	X																																																																																																																												
5. Are listed documents enclosed?	X																																																																																																																												
FORM DC-1																																																																																																																													
6. Present?	X																																																																																																																												
7. Complete?	X																																																																																																																												
8. Accurate?	X																																																																																																																												
CHAIN-OF-CUSTODY RECORD(s)																																																																																																																													
9. Signed?		X																																																																																																																											
10. Dated?	X																																																																																																																												
TRAFFIC REPORT(s) PACKING LIST(s)																																																																																																																													
11. Signed?	X																																																																																																																												
12. Dated?	X																																																																																																																												
AIRBILLS/AIRBILL STICKER																																																																																																																													
13. Present?	X																																																																																																																												
14. Signed?	X																																																																																																																												
15. Dated?	X																																																																																																																												
SAMPLE TAGS																																																																																																																													
16. Does DC-1 list tags as being included?	X																																																																																																																												
17. Present?	X																																																																																																																												
OTHER DOCUMENTS																																																																																																																													
18. Complete?	X																																																																																																																												
19. Legible?	X																																																																																																																												
20. Original?		X																																																																																																																											
20a. If "NO", does the copy indicate where original documents are located?	X
